

The image shows a map of a river network. The rivers are represented by lines of various colors: blue, green, and orange. The orange lines are more numerous and form a dense, interconnected web in the middle-left portion of the map. The blue and green lines are more sparsely distributed in the top-right and bottom-right portions. Two black rectangular boxes highlight specific areas: one in the top right labeled 'Sparse region' and one in the middle left labeled 'Dense region'.
